

Xena Pyrotechnics is a leading company in the pyrotechnics industry, based in the Netherlands and founded in 1999. Since our inception, we have gained a strong reputation for delivering exceptional fireworks displays, both outdoor and indoor. Currently, we produce approximately 100 pyro-shows annually.

Our team consists of 7 full-time employees, supported by a solid base of part-time workers. Until 2019, we were the proud organizers of the fireworks festival in Scheveningen (NL), which attracted around 150.000 visitors over a single weekend. Due to a large number of visitors the festival was discontinued.

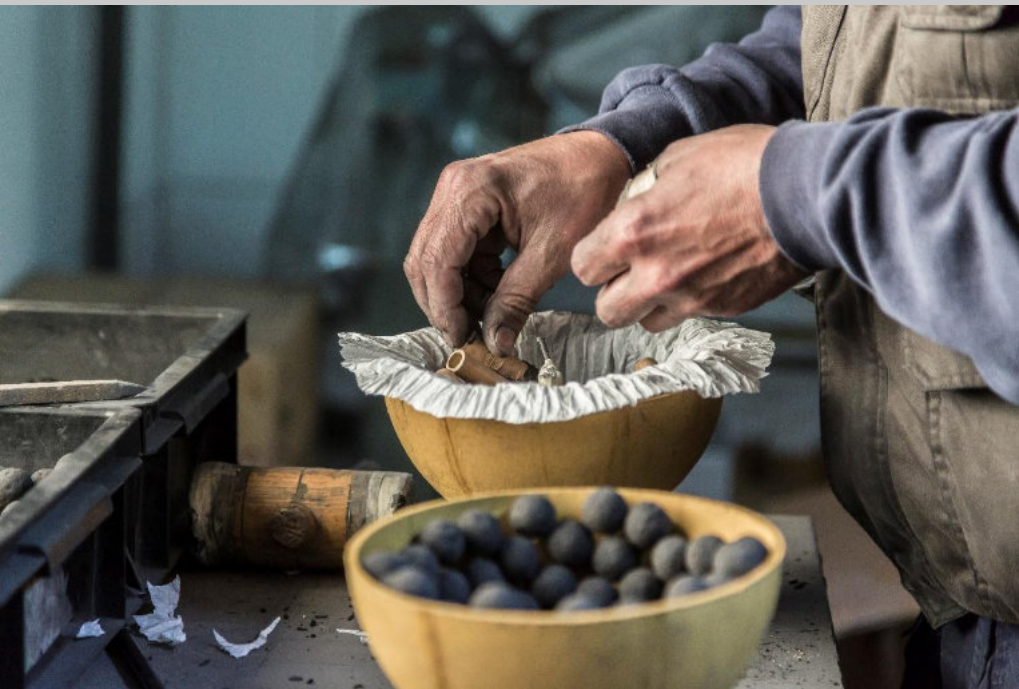

In addition to our work in Scheveningen (NL), we have signature shows organized for the Zena Trophy and annually we execute the closing fireworks show during World Port Days in the heart of Rotterdam (NL).

Besides traditional fireworks displays, we have a strong presence in the dance event scene. Here, we provide in SFX and pyro closing shows to the need of our customers.

Safety and reliability are the core values of our company. To ensure that all of our shows are performed to the highest standard, we utilize advanced firing systems such as Galaxis, Pyrotronics and FireTek, along with sturdy rack systems for mortars and candles. For single-shot effects, we are fully equipped with the PyroLama system.

We maximize our creative potential through a broad network of trusted suppliers, including Ricasa, Europla, Parente, Startrade, and Pyroartist. Additionally, we are proud distributor of products from Pirotecnia San Pio (San Severo, Italy). Through this cooperation we are able to use custom made products and to innovate continuously.

Our ambition is to expand our footprint in Europe and participate in pyrotechnical competitions. In 2026 we will participate in competitions held in Malta, Spain, France and Germany.

Our show over the Skyline of Valletta, Malta. In 2026 we have participated in the Malta International Fireworks Festival, our show was well received by the audience and the jury!

We have a lean and structured workflow from the design phase until the physical setup. All of our shows are (semi) automatic and programmed. This allows us to confidently produce large scale projects.

At Xena Pyrotechnics we are capable of producing shows in any situation. We like to think beyond and create a complete show using SFX, laser, light and pyrotechnic effects.

Through the years we have become a true multi FX company
